**A scientist said robots will be more intelligent than humans by 2029.** [1] The scientist's name is Ray Kurzweil. He works for Google as Director of Engineering. He is one of the world's leading experts on artificial intelligence (A.I.). **Mr. Kurzweil believes computers will be able to learn from experiences, just like humans. He also thinks they will be able to tell jokes and stories, and even flirt.** [2] Kurzweil's 2029 prediction is a lot sooner than many people thought. **The scientist said that in 1999, many A.I. experts said it would be hundreds of years before a computer was more intelligent than a human.** [3] He said that it would not be long before computer intelligence is one billion times more powerful than the human brain.

**Mr Kurzweil joked that many years ago, people thought he was a little crazy for predicting computers would be as intelligent as humans.** [4] His thinking has stayed the same but everyone else has changed the way they think. **He said: "My views are not radical any more. I've actually stayed consistent. It's the rest of the world that's changing its view."** [5]

There is no escaping the fact that the media has become one of the most powerful influences in our lives. **TV, radio and newspapers are the three main forms of media** [6] that we have daily contact with. Because of their importance it is inevitable that controversy will often go hand in hand with such a powerful force.

The media is not always used wisely or responsibly and is often a source of gossip, scandal or propaganda. **Politicians use it in their political campaigns in order to gain support.** [7] **Entertainers and celebrities use it to promote themselves and keep themselves in the public eye.** [8]

This is of course to their advantage but on the other hand they are also open to the disadvantages of publicity. Private lives are brought out into the open and the word private no longer suits the situation. **Celebrities find themselves being followed and photographed at all times of day or night and in the most personal situations.** [9] A survey has been carried out asking people what they thought of this invasion of privacy and a massive 85% thought that celebrities were asking for it, 11% believed they were still entitled to their privacy and 4% had no opinion either way. The survey also asked which form of media people felt they were most influenced by. **Over two thirds of the people asked said TV** [10], rather than radio or newspapers.
